

About the platform

General description of the service

What is Paykassma?

Paykassma.com – an online service designed to make secure money transfers between the Client of the service and Customers of the Client's resource (Customer).

Services provided by the service **Paykassma.com**

- Acceptance of payments (deposits)
- Withdrawals
- Settlements

For convenience and safety of doing wire transfers, Service **Paykassma.com** offers the following:

- *Payment Page* – a convenient payment form connected to the main Customer's Resource.
- *Customer's Personal Account* – a resource which allows the Customer to customize the appearance of the Payment Page and monitor private funds.
- *API* - application programming interface which allows the Customer to safely withdraw money.

Advantages of Service **Paykassma.com**

- Fast integration into web-resources with the help of an iframe-window or a specialized payment page which allows to accept e-payments in multiple currencies through e-wallets, bank transfers or payment terminals;
- To ensure Customer's safety and preserve their private funds, the Service does not contain or store User's personal data. Transaction requests are signed with a private key with the use of encryption algorithms;
- Acceptance of P2P and P2C payments;
- No holds or rolling reserves;
- No chargebacks;
- Convenient statistics in Customer's Personal Account;
- Connecting to any business area: online shops, betting, trading, gambling, etc;
- Instant depositing of money, clear and simple money transfer process;
- Multilingual technical support, 24/7;
- Withdrawals within 24 hours.

To get initial access to your Personal Account (farther – PA), contact Paykassma technical support (farther -Paykassma TS):
